Dutch
Mother tongue

English

French

Summary

My previous work experience sparked a growing interest in technical and analytical tasks, which led me to pursue studies in data analysis and full stack development.

During my training, I worked with Laravel, React, and REST APIs, and developed projects where I implemented features such as user authentication and interactive interfaces.

I'm a fast learner, comfortable working with Git, and enjoy contributing to a team. I thrive best in an environment that supports growth and collaboration.

Education

Syntra AB
Full Stack Developer
Sep 2024 - Jun 2025

HTML | CSS+SCSS | Tailwind | JavaScript | TypeScript | Node.js | React | Next.js | MAMP | PHP | Laravel | Drupal | CRUD | React | MySQL | MongoDB | sqlite | Postgress | Express API | external APIs | Docker | GIT | Agile
